

Break.

- Palettes: all final palettes now consist of 10 colors.
- `luadraw` products: the `getPal` dictionary array has been converted into a function accepting string palette names (with or without `pal` prefix). See below.

New.

- Palettes.
 - Added `Lemon` and `ShiftRainbow` palettes (`luadraw` creation process used).
 - Added 37 palettes from the `Scientific Coulour Maps` project.
- `luadraw` product: the `getPal` function has an optional argument `options` (dict-like array).
 - `extract` key allows to give a list of non-zero integers to extract specific colors (preserves order).
 - `reverse` key allows to give a boolean to reverse palette color order, or not (`false` by default)
 - `shift` key allows to give an integer for circular color shift.
- Documentations
 - Added English PDF manual.
 - Showcase: two PDF files demonstrate the use of each palette (white and dark modes).
