1 Improving the source code

Participation as a coder is made via the repository https://github.com/projetmbc/for-writing/tree/aprism/@prism corresponding to the `@prism` development branch. Here is what you can do, details can be found in the file https://github.com/projetmbc/for-writing/blob/aprism/@prism/contrib/products/README.md.

1. Create new palettes within an existing implementation.

2. Propose a new implementation.

3. Combine both approaches above.
