at-prism **project**

«AUTHOR»

«DATE-N-VERSION»

The `at-prism` project [1] provides small size color palettes that can be used to create expressive color maps for graphics.

---

[1] The name comes from "*A·esthetic T·oolkit - P·alettes to R·ender I·llustrative S·cientific M·aps*". This name is also a play on words: where light meets the prism, it breaks down into an informative spectrum.
